Assignment Brief (RQF)

Higher National Diploma in Computing

Unit 6: Planning a Computing Project (Pearson-Set)

Assignment Brief

Student Name/ID Number	HND-69
Unit Number and Title	Unit 6 – Planning a computing project (Pearson-Set)
Academic Year	2026
Unit Tutor	Mrs. Thiri Win
Assignment Title	A -1 of 1: Produce projects plans & Present project recommendations, planning a Computing Project for Cyber Security
Issue Date	15/May/2026 (Friday)
Submission Date	23/June/2026 (Tuesday)
Submission Format	
The submission is in the form of an individual written report. You are required to make use of Cover Page, Table of Contents, Batch Number and Student name in header, Page number in footer, all paragraphs justification, margin and line spacing are suitable. The recommended word limit is 2,500–3,000 words , although you will not be penalised for exceeding the total word limit.	

Your report must be formatted as follow:

- Font Name : Verdana
- Font Size : 12 pt
- Margin: 0.75 inches (round)
- Line Spacing: 1.5 pt.
- Alignment : Justify
- Left hand side of header: Batch Number
- Right and side of header: Your name
- Centre of footer: Page Number
- Use the Harvard referencing system
- Complete the tile page and sign the statement of authenticity
- Your assignment must be submitted in pdf format

Unit Learning Outcomes

The purpose of this assignment is to:

LO1 Conduct small-scale research, information gathering, and data collection to generate knowledge on an identified subject

LO2 Explore the features and business requirements of organizations in an identified sector

LO3 Produce project plans based on research of the chosen theme for an identified organization.

LO4 Present your project recommendations and justifications of decisions made, based on research of the identified theme and sector.

Transferable skills and competencies developed

On successful completion of this unit, students will be able to make a mini-research, good planning project and analyse environmental data.

Vocational scenario

You are working as a **Research Assistant** at the **University's Data Science Department**. The university is aiming to strengthen its digital security systems using IOT and improve data protection across all academic and administrative areas. Recently, there has been growing concern about potential cyberattacks targeting sensitive data, such as student personal information, academic results, and financial transactions.

To address these issues, the Head of Department has assigned you to carry out a research project that can be used to detect and prevent cyberattacks effectively.

As part of this project, you are required to:

- Plan a structured research project that examines "The Implications of IoT devices in cybersecurity"
- Evaluate both the **benefits and limitations** in cybersecurity systems.

Your final submission should include a **project plan, research findings**, and **evaluation** supported by data, analysis, and appropriate references. Therefore, your responsibility is to do the research project to that effect. Then, make a project planning to cover that effect.

Your research project must be covering the following topic.

- **The Implications of IoT devices in cybersecurity**

Assignment activity and guidance

According to the above scenario, you may do the following tasks.

Task 1:

- Demonstrate qualitative and quantitative research methods to generate relevant primary data for an identified theme.
- Examine secondary sources to collect relevant secondary data and information for an identified theme.
- Discuss the features and operational areas of a business in an identified sector.

- Discuss the role of stakeholders and their impact on the success of a business.
- Moreover, analyse data and information from primary and secondary sources, and the challenges to the success of a business in an identified sector.
- In addition, interpret findings to generate knowledge on how the research theme supports business requirements in the identified sector.

Task 2:

- You must devise a comprehensive project plan for your given project including Gantt Chart and Work Break Structure of your proposed project.
- Moreover, you must also identify the risks and benefits of your proposed project.

Task 3:

- You must communicate the appropriate project recommendations for technical and non-technical audiences.
- You must present arguments for the planning decisions made when developing the project plans.
- You must discuss accuracy and reliability of the different research methods applied.
- Moreover, you must assess the extend to which the project recommendations meets the needs of the identified organization.
- Continually, you should evaluate the project planning recommendations made concerning the needs of the identified organization and the accuracy and reliability of the research carried out.

Evidence:

You need to produce a formal report file, recommended word limit is **2,500–3,000 words**, data collection file (eg. excel) , Gantt Chart and project charter that includes cost, scope and schedule. You need to upload a presentation file of your findings.

Recommended Resources

This unit can use online survey form, offline survey form for the correspondent student's mini research. It can be also used Gantt Chart for their project time management.

Note to student:

- Carefully check the submission date and the instructions given with the assignments.
- Late assignments will not be accepted, except for valid circumstances with supporting evidence.
- Ensure that you give yourself enough time to complete the assignment by the due date.
- Do not leave things such as printing to the late minute-excuses of this nature will not be accepted for failure to hand-in the work on time.
- You must take responsibility for managing your own time effectively.
- If you are unable to hand in your assignment on time and have valid reasons such as illness, you may apply (in writing) for an extension.
- Take great care that if you use other people's work or ideas in your assignment, you properly reference them in your text and any bibliography.

Note: Plagiarism is an offence. Plagiarized work will be differed.

Interim Review Session (Formative Assessment)

- 28th May 2026 (Thursday)
- 29th May 2026 (Friday)

Submit your final work to <https://moodle.gusto-education.com>

- 23th June 2026 (Tuesday) 11:55 pm

Learning Outcomes and Assessment Criteria

Pass	Merit	Distinction
LO1 Conduct small-scale research, information gathering and data collection to generate knowledge on an identified subject		LO1 and LO2 D1 Interpret findings to generate knowledge on how the research theme supports business requirements in the identified sector.
P1 Demonstrate qualitative and quantitative research methods to generate relevant primary data for an identified theme. P2 Examine secondary sources to collect relevant secondary data and information for an identified theme.	M1 Analyse data and information from primary and secondary sources to generate knowledge on an identified theme.	
LO2 Explore the features and business requirements of organisations in an identified sector		
P3 Discuss the features and operational areas of a businesses in an identified sector. P4 Discuss the role of stakeholders and their impact on the success of a business.	M2 Analyse the challenges to the success of a business in an identified sector.	

Pass	Merit	Distinction
LO3 Produce project plans based on research of the chosen theme for an identified organisation		LO3 and LO4 D2 Evaluate the project planning recommendations made in relation to the needs of the identified organisation and the accuracy and reliability of the research carried out.
P5 Devise comprehensive project plans for a chosen scenario, including a work and resource allocation breakdown using appropriate tools.	M3 Produce comprehensive project plans that effectively consider aims, objectives and risks/benefits for an identified organization.	
LO4 Present your project recommendations and justifications of decisions made, based on research of the identified theme and sector		
P6 Communicate appropriate project recommendations for technical and non-technical audiences. P7 Present arguments for the planning decisions made when developing the project plans. P8 Discuss accuracy and reliability of the different research methods applied.	M4 Assess the extent to which the project recommendations meet the needs of the identified organisation, including fully-supported rationales for planning decisions made.
