

Higher National Diploma in Computing

Unit 13: Website Design & Development

Assignment Brief

Student Name/ID Number	
Unit Number and Title	Unit 13: Website Design & Development
Academic Year	2026
Unit Tutor	Ms. Ei Po Po Aung
Assignment Title	Assignment 1 of 2: Understanding Server Technologies and Website Development Tools
Issue Date	5 May 2026 (Tuesday)
Submission Date	31 May 2026 (Saturday)
Submission Format	
The submission is in the form of an individual written report. You should submit report in pdf and program codes in zip format. This should be written in a concise formal business style using single spacing and font size 12. You are required to make use of headings, paragraphs and subsections as appropriate, and all work must be supported with research and referencing using the Harvard referencing system. Use Microsoft Word for documentation and report. Your report must be formatted as follow: • Font Name : Verdana • Font : 12 pt • Margin : 0.75 inches (round)	

- Line Spacing : 1.5 pt.
- Alignment : Justify
- Left hand side of header : Batch Number
- Right and side of header : Your name
- Center of footer : Page Number
- Use the Harvard referencing system
- Complete the tile page and sign the statement of authenticity
- Your assignment must be submitted in **pdf** format

Unit Learning Outcomes

The purpose of this assignment is to:

LO1: Explain server technologies and management services associated with hosting and managing websites.

LO2: Categorise website technologies, tools and software used to develop websites

Transferable skills and competencies developed

On successful completion of this unit, students will be able to explain the server technologies and management services associated with the hosting and management of secure websites, categorise website technologies, tools and software used to develop websites.

Vocational scenario

Scenario:

The **“Bright Arc” Company** is one of the leading creative web solutions and marketing company in MYANMAR. You work as a **junior web developer** in this company. The manager asked you **to create an engaging report to help train junior staff members.**

A report that explains the different server technologies and management services associated with hosting and managing websites, as well as the various website technologies, tools and software used to develop websites.

Assignment activity and guidance

Your report must include:

Task 1: Explain Server technologies and the management services associated with hosting and managing websites (including search engine optimisation) with the following details:

- a) Identify the **purpose and types of DNS**, including **explanations** on **how domain names are organised and managed**

(What is DNS, why do we use DNS? What are the types of DNS? What does each type do? What is Domain Name? Explain How domain names are organized and managed.)

- b) Explain the **purpose** and relationships between **Communication Protocols, Server Hardware, Operating Systems, Web Server Software, Common Web Development Technologies and Frameworks** and **Search Engine Optimisation** with regards to **designing, publishing and accessing a website.**

Task 2: A review of different website technologies supported with the tools and software used to develop websites (including the differences between online website creation tools and custom-built sites) with the following details:

- a) Discuss the **capabilities and relationships between front-end and back-end website technologies** and explain how these **relate to presentation and application layers.**
- b) Discuss the **differences between online website creation tools and custombuilt sites** with regards to **design flexibility, performance, functionality, User Experience (UX) and User Interface (UI).**

Moreover, you may **analyse** the impact of **common web development technologies and frameworks** with regard to **website design, functionality and management**, **review** the influence of search engines on website performance and provide evidence-based support **for improving a site's index value and rank through search engine optimization**, and **analyse** a range of **tools and techniques** available to design and **develop a custom- built website.**

Finally, you would like to **justify** the technologies, management services, tools and software chosen to **realise a custom-built website.**

Your detailed report should include a summary of your additional, evaluated or critically reviewed technical notes on all of the expected topics.

Note to students:

- Carefully check the submission date and the instructions given with the assignments.
- Late assignments will not be accepted, except for valid circumstances with supporting evidence.
- Ensure that you give yourself enough time to complete the assignment by the due date.
- Do not leave things such as printing to the late minute-excuses of this nature will not be accepted for failure to hand-in the work on time.
- You must take responsibility for managing your own time effectively.
- If you are unable to hand in your assignment on time and have valid reasons such as illness, you may apply (in writing) for an extension.
- Take great care that if you use other people's work or ideas in your assignment, you properly reference them in your text and any bibliography.

Note: Plagiarism is an offence. Plagiarized work will be differed.

Interim Review Session (Formative Assessment)

- 18 May 2026 (Monday)
- 19 May 2026 (Tuesday)

Submit the work to <https://moodle.gusto-education.com>. 23:55 PM On 31

May 2026(Saturday).

Assignment Criteria

Pass	Merit	Distinction
LO1 Explain server technologies and management services associated with hosting and managing websites		D1 Justify the technologies, management services, tools and software chosen to realise a custom-built website.
P1 Identify the purpose and types of DNS, including explanations on how domain names are organised and managed. P2 Explain the purpose and relationships between communication protocols, server hardware, operating systems and web server software with regard to designing, publishing and accessing a website.	M1 Analyse the impact of common web development technologies and frameworks with regard to website design, functionality and management. M2 Review the influence of search engines on website performance and provide evidence-based support for improving a site's index value and rank through search engine optimisation.	
LO2 Categorise website technologies, tools and software used to develop websites		
P3 Discuss the capabilities and relationships between front-end and back-end website technologies and explain how they relate to presentation and application layers. P4 Discuss the differences between online website creation tools and custom-built sites with regard to design flexibility, performance, functionality, User Experience (UX) and User Interface (UI).	M3 Analyse a range of tools and techniques available to design and develop a custom-built website.
