

Assignment Brief (RQF)

Higher National Certificate/Diploma in Computing

Unit 13: Website Design & Development

Assignment Brief

Student Name/ID Number	
Unit Number and Title	Unit 13: Website Design & Development
Academic Year	2026
Unit Tutor	Ms. Ei Po Po Aung
Assignment Title	Assignment 2 of 2: Designing, Developing and Testing the Multiple Page Website
Issue Date	1 st June 2026(Monday)
Submission Date	30 th June 2026 (Tuesday)
Submission Format	
The submission is in the form of an individual written report. You should submit report in pdf and program codes in zip format. This should be written in a concise formal business style using single spacing and font size 12. You are required to make use of headings, paragraphs and subsections as appropriate, and all work must be supported with research and referencing using the Harvard referencing system.	

Use **Microsoft Word** for documentation and report.

Your report must be formatted as follow:

- Font Name : Times New Roman
- Font : 12 pt
- Margin : 0.75 inches (round)
- Line Spacing : 1.5 pt.
- Alignment : Justify
- Left hand side of header : Batch Number
- Right and side of header : Your name
- Center of footer : Page Number
- Use the Harvard referencing system
- Complete the tile page and sign the statement of authenticity
- Your assignment must be submitted in **pdf** format

Unit Learning Outcomes

The purpose of this assignment is to:

LO3: Utilize website technologies, tools and techniques with good design principles to create a multipage website.

LO4: Create and use a test plan to review the performance and design of a multipage website.

Transferable skills and competencies developed

On successful completion of the unit, students will be able to explain the server technologies and management services associated with the hosting and management of secure websites, categorize website technologies, tools and software used to develop websites, utilize website technologies, tools and techniques with good design principles to create a multipage website and create and use a Test Plan to review the performance and design of a multipage website.

Vocational scenario

Scenario:

Since 2018, "**FreshFarm Market**" has been providing fresh and organic agricultural products such as fruits, vegetables, grains, and dairy items to customers in urban areas. The company works directly with local farmers to ensure high-quality, chemical-free food at fair prices.

People want more healthy food and easy shopping, so the owners decided to create a website for FreshFarm Market. This will help them reach more customers and sell products online.

To ensure a smooth and enjoyable shopping experience, they require a user-friendly, visually appealing, and responsive website. The website should include an organized product catalog with categories (e.g., fruits, vegetables, grains, dairy products), a product gallery with clear images and descriptions, an intuitive shopping cart, and a secure and hassle-free checkout process. The ultimate goal is to improve brand visibility, support local farmers, attract new customers, and provide existing customers with a more convenient way to shop.

"**FreshFarm Market**" wants to have a website with the domain name "**freshfarmmarket.com**" to represent their brand online. They also want a section for customer reviews, product recommendations, seasonal discounts, and promotional offers to attract more customers.

They contact "**Bright Arc**", a web development agency and one of the leading creative web solutions companies in Myanmar, to help bring their vision to life. You work as a junior web developer in this company. The project manager has assigned you the task of designing and implementing the website for "**FreshFarm Market**".

Assignment activity and guidance

The recommendation for designing and developing the website:

- You must need to create a design document with appropriate principles and standard guidelines to produce a branded, **multipage website** before developing the website.

- The Website should have around **7 pages**, each of those pages should use a similar style so that the pages look like they belong to the same website. And every page must have a meaningful title and relevant content. Each HTML page and CSS should pass the W3C validation. You must use at least one **external style sheet**.
- You should **have consistent navigation for all pages** and organize all the pages in a good structure. Your website should be **easy to use, easy to read; background color, front end color, table, form, images**, etc. should be properly managed and organized.
- You should create a contact us page and place the **Google map on the contact page**.
- You should have a **customer inquiry form** on your website (only front-end, you don't have to write any server-side code to store the data) which must have text box, label, combo box, radio button, check box, command button, list box, etc.
- You should use some multi-media content e.g. audio, video, flash, etc.

NOTE: if you copy any images, sound, video from Google make sure the copyright issue of using these materials so you have to reference the origin of that resource in a comment in your HTML or CSS file.

Your Task is to develop a report that address the following:

Task 1: Utilise website technologies, tools and techniques with good design principles

(a) Create a **design document** for a branded, multipage website supported with medium fidelity wireframes and a full set of clients of user requirements.

- Purpose of the website
- Targeted audience
- A full set of client requirements
- User requirements
- Sitemap /Navigation map which shows all key pages and their relationship
- Wireframes which show a view of the content on the key pages
- Visual style specifications: typefaces, color, backgrounds, images

(b) Build the website based on your design document using current standards, incorporating features in Task 1 a, produce a branded multipage website for "**FreshFarm Market**" with realistic content on the key pages.

When implementing the design, your website must:

- Be responsive
- Background color, front end color, table, form, images, etc. should be properly managed and organized.
- Use CSS for a consistent style of all pages for navigation and classes
- Use headings, lists, and buttons
- Have **clickable images**
- Be interactive and contain animation
- Consistent page title: "**freshfarmmarket.com**" and proper site description.
- Web pages will display in a wide variety of browsers and computer

Task 2: (a) Create a suitable **Test Plan** identifying the key performance areas and use it to review the functionality and performance of your website. You must include: For each key page,

- Checking all **links and buttons**
- **Animations and modals** work as expected (Run the page with modals)
- Correct spelling and grammar
- Correct content
- Correct responsive, appearance on mobile, tablet and desktop

You will need to critically review the actual outcomes of the tests against your expected outcomes.

Example: Test Number	Test Item	Actual Result	Expected Result	Pass / Fail
----------------------	-----------	---------------	-----------------	-------------

(b) Your design can have **peer reviewed** by a number of colleagues. When it is complete, ask them to review your plan for the following:

- Meeting the needs of "**FreshFarm Market**"
- Suitability of the web site for the **target audience** (appropriate graphics and good quality content)
- **Usability** and accessibility of the design (effective navigation)
- **Attractiveness** of the design (user-friendly)

Prepare a questionnaire asking your colleagues to rate each section of the design for the four criteria above on a **scale of 1-5**. Allow for written comments and an overall conclusion. It is suggested that in order to obtain meaningful results, the questionnaire should be completed by at **least 3 peers**.

Moreover, **Justify** the multipage **website implementation decisions** against the **design document** and **Analyse** the Quality Assurance (QA) process and review how it was implemented during the multipage website design and development stages and then **Evaluate** the design and development process of the multipage website against the design document including any technical challenges faced. Finally **Evaluate** the results of the Test Plan and the overall success of the multipage website with recommendations for improvement.

Pass	Merit	Distinction
L03 Utilise website technologies, tools and techniques with good design principles to create a multipage website		D2 Evaluate the design and development process of the multipage website against the design document including any technical challenges faced.
P5 Create a design document for a branded, multipage website, supported with medium fidelity wireframes and a full set of client and user requirements. P6 Use the design document with appropriate principles, standards and guidelines to produce a branded, multipage website supported with realistic content.	M4 Justify the multipage website implementation decisions against the design document.	
L04 Create and use a Test Plan to review the performance and design of a multipage website		D3 Evaluate the results of the Test Plan and the overall success of the multipage website with recommendations for improvement.
P7 Create a suitable test plan, identifying key performance areas to review the functionality and performance of the multipage website developed	M5 Analyse the Quality Assurance (QA) process and review how it was implemented during the multipage website design and development stages.	

Note to students:

- Carefully check the submission date and the instructions given with the assignments.
- Late assignments will not be accepted, except for valid circumstances with supporting evidence.
- Ensure that you give yourself enough time to complete the assignment by the due date.
- Do not leave things such as printing to the late minute-excuses of this nature will not be accepted for failure to hand-in the work on time.
- You must take responsibility for managing your own time effectively.
- If you are unable to hand in your assignment on time and have valid reasons such as illness, you may apply (in writing) for an extension.
- Take great care that if you use other people's work or ideas in your assignment, you properly reference them in your text and any bibliography.

Note: Plagiarism is an offence. Plagiarized work will be differed.

Interim Review Session (Formative Assessment)

- 2:45 - 4:15 PM On 15th June 2026 (Monday)
- 2:45 - 4:15 PM On 16th June 2026(Tuesday)

Submit the work to <https://moodle.gusto-education.com>.

- 23:55 PM on 30th June 2026 (Tuesday)
